Election/Restriction

This application contains claims directed to the following patentably distinct species of the claimed invention:

(I) method evaluating nucleic acid sequence at specific codons.

(II) method using resistance test vector.

The claimed mutations are:

(a) codon 88

(b) codon 82

(c) codon 90

(d) codon 66

(e) codon 154

(f) codon 30

(g) codon 50

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

To assist applicant in choosing species, the claims fall into species as follows:

Ia, claims 1-16

Ib, claims 17-20, 22-44, 68-70, 80-83, 98-103, 107-113, 117-120

Ic, claims 45-70, 80-85, 98-120

If, claims 123, 125

Ig, claim 126

Art Unit: 1648

II, generic claims 21, 79, 92, 93, 124

IIa, claims 13-20

IIb, claims 71, 72, 75-77, 86-89, 121-122

IIc, claims 73-75, 78, 86-91, 121-122

IId, claims 94, 96, 97

IIe, claims 95-97

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The two assays are seen as patentably distinct, because they use different materials and different active steps. The seven mutations are seen as patentably distinct, because each causes a

Art Unit: 1648

different structural alteration in the protease, with different biological effects. The searches for the two assays are not coextensive, and the searches for the mutations are not coextensive.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
